The dog days of summer are here, and with summer programs in full swing, the laughter of the kids is everywhere. There is lots going on at Peak Software as we continue to work hard to bring you the features that you want. New this quarter, you'll find grade level support for class registrations. We are also releasing childcare check-in and checkout, giving you a formal way to accept and release children from the care of your facility.

Payment Plan, which was first released in the desktop app, is now on the web. The Payment Plan module gives you the ability to allow customers to pay on a schedule and have the installments automatically charged to their credit card.

Campground reservations are a hidden gem in Sportsman, perfect for dealing with multi-day registrations. Campground reservations has a new setup interface in Sportsman Web to make it easier to define campsites and sell multi-day reservations.

What are we working on now? Our road map is busy! Event ticketing with QR codes has been so successful that we're reworking the definition screen to make it easier to setup and use. We are bringing the recurring membership payment mechanism to Sportsman Web, and in the process, we'll be adding features to allow you to run them automatically. And I've even seen a rough draft of a tournament scheduling bracket coming to Web, although that one is a little ways down the road.

Enjoy the summer, don't be too shy to call us if you need us, and, thank you for letting us serve you.

- Charlie Warrell, Director of Development & CEO

Sportsman Web Updates

The Sportsman Web development team has had their hands full, bringing exciting additions in functionality to all of our Web users. Some of our exciting accomplishments this quarter have been bringing the Payment Plan and Check in/out features to Web. The Payment Plan module, has become an awesome tool for many of our customers who are using it to make high dollar programs more accessible to their patrons.

Payment Plan allows you to create customized monthly, weekly, or date specific payment schedules to associate with programs and activities, with credit card payments running automatically according to a schedule. We're really thrilled to bring that functionality to Sportsman Web's easy to access platform.

Schedule Name
 Weekly, Four Week

A payment schedule includes the initial payment at the time of sale plus the payments defined by the rules below. Example: If you defined two payment days below, a customer would be charged 3 times. Once for the initial payment at the time of sale, and then two more on the specified days. So a \$90 charge would be broken up into three \$30 dollar charges.

One of our major goals in developing Sportsman Web has been creating a great user experience, and improving ease of use for your staff and patrons. The updated interface for **Campground definition** hits it out of the park, making multi-day facility reservations simple to create and easy to sell. When defining a new campground, just select the

Campground reservation type. You'll be able to add your sites, set their check in/out times, and days of availability, and create pricing for residents and non-residents all from one simple screen. Patrons can reserve online and select multiple dates and sites simultaneously for easy booking.

Child Check-in and Check-out

The new childcare check-in/out feature is a great solution for managing secure pickup and drop off of children for summer camps, childcare programs and more. This feature, exclusive to Sportsman Web, includes added security features such as a list of authorized pick-up persons, with photos and passphrase identification.

Additional notes sections in patron accounts are available for notes specific to childcare, and display whenever the child is picked up or dropped off. You can easily pull a check-in/out log or a list of authorizations on demand and for auditing. The check-in/out feature is included with the Attendance Module, and can be used in conjunction with attendance features for additional reporting and for attendance based billing. For more information about childcare check-in/out, please reach out to our support team at 801-572-3570.

Grade Level Based Registration Restriction

Age based activity restriction has long been an option in Sportsman, and now, by popular request, we've added grade level restrictions so you can choose the method of age restriction that best fits your organization and your community. We know that from district to district and organization to organization, school start dates and cutoff dates can vary, so we've made the grade cutoff date customizable.

Simply navigate to site configuration, and select the date that applies.

To view a patron's current grade level, navigate to their Profile Information screen, and double-click on the patron's name in the Group Members section.

The date when grades roll over for a new school year. This is used for grade restrictions on registrations.

ActivityReg Website Spotlight: Fort Atkinson Parks and Recreation

The Activity Registration module in Sportsman allows you to create and customize a patron registration website. It has many features and configuration options, and can be a powerful tool to communicate with your patrons. We want to recognize a Sportsman client who has built an outstanding registration site.

Fort Atkinson has created a unique and informational site by using quick link buttons on their home page connected to additional content pages with tons of great information about their programs and offerings. Awesome job taking advantage of the additional content pages and creating a detailed and organized site, Fort Atkinson!

For help customizing your own Activity Reg site you can contact our support team or visit our support site: [Setup & Manage ActivityReg](#)
