Integration with Clearent

ActivityReg Outstanding Balance Prompt

Age Restriction for Membership Sales

Electronic Waiver Agreement

Feature Request Board Completed Items

_____

We are off to a great start in 2024 with some exciting new developments to catch you up on. We've been taking advantage of the new feature request voting board and prioritizing development on the functionality that is most important to you.

The Sportsman team is still full steam ahead with development of the new version of ActivityReg. We're adding more pieces to that giant jigsaw puzzle all the time and can hardly wait to show you what we've done.

Sportsman Integration with CLEARENT™
INTELLIGENT PROCESSING

Spring's arrival means your ball fields are booked, and your concession stands are likely doing booming business these days. With payment flexibility at top of mind, we are proud to announce Clearent as an exciting new addition to the list of payment processors integrated with Sportsman Web.
Clearent offers cutting edge technology, and shares our commitment to excellent customer service and support.

Clearent's wireless EMV devices offer power, security, and portability like never before. Their handheld credit card terminals will enable you to sell day passes, registrations, event tickets and concessions from any tablet or cell phone with an internet connection.

ActivityReg Outstanding Balance Prompt

We've been blown away by your positive responses to our new feature request voting board in Sportsman Web. Sportsman has always been driven by the needs of our customers, and we love the opportunity to hear, directly from you, what will have the most impact for your organizations.

The first feature to be voted to the top and developed based on the request board is the ActivityReg prompt for payment of outstanding balances.

When a patron with an outstanding account balance logs into their account on your ActivityReg site, they will be prompted to make a payment and automatically directed to their account screen. We know you have things you'd rather spend your time on than chasing down account balances, and giving your patrons a reminder and a convenient way to pay will be a great way to clear those up.

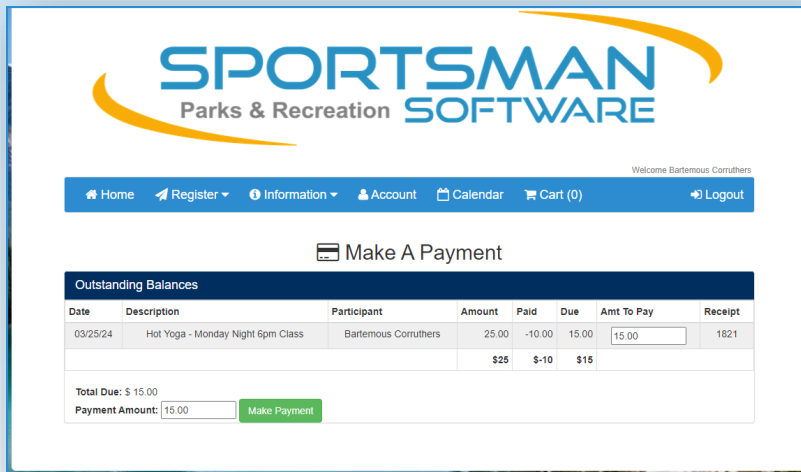

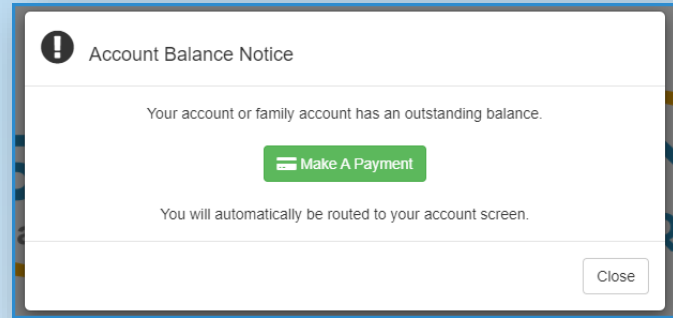

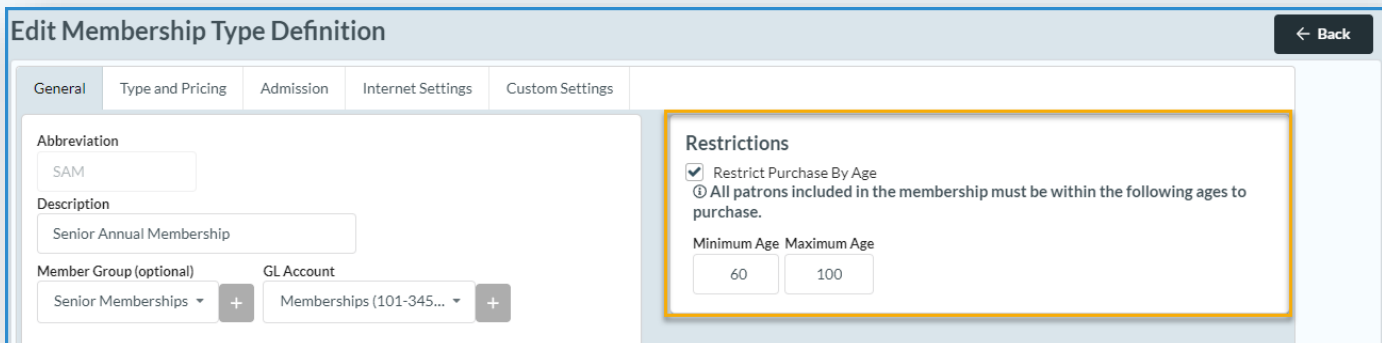

We want to extend a big thank you to those that voted for this feature, and encourage all who are interested to check out the board, submit your own requests, and vote for existing requests that would have a positive impact for your organization. Your feedback helps us shape the future of Sportsman.

Feature Request Voting Board**

Age Restriction for Membership Sales

Another client-driven enhancement to Sportsman added this quarter is the ability to restrict membership sales based on age. Configuration is simple, just check the box to Restrict Purchase by Age, and set the age parameters you'd like to associate with the membership. Any patron included in the membership sale will be required to fall within the set ages to qualify.

Electronic Waiver Agreement

Another request to be completed from the Feature Request Board is the Electronic Waiver Agreement for in-house and over-the phone registrations. You asked for a convenient and foolproof way to collect waivers from your patrons for registrations not completed online, and the Sportsman Web development team delivered.

You no longer have to print, collect signature, scan, and upload a waiver to a patron's profile. Once enabled, Sportsman will prompt you during the registration process to verify a valid cell phone number is entered for the patron, then send the waiver agreement via text.

The patron will click the link in their text to be directed to the waiver agreement. Sportsman will show the waiver status, in real time, moving from incomplete, to waiting for agreement, then to complete and allow you to move forward with the registration.

The Electronic Waiver Agreement feature is exclusively available in Sportsman Web, and once enabled, you will be required to complete any in-house registrations using Sportsman Web. (Which is pretty perfect, since that's where all the good stuff is anyway!)

Check out the Guide for E-Waiver Agreement

Completed Feature Request Board Items

We're taking our cues from our you on what features will benefit your organizations the most. The Sportsman Web development team has completed several requested items from the feature request board recently. In addition to ActivityReg's prompt for payment, and the Electronic Waiver Agreement, recently completed feature requests include:

- Scheduled Reports for Program Class Rosters
- Cursor Focus on *New Waiver Signed* Date Field
- Group ID Number Displayed in Sportsman Web
- Scheduled Reports for Rentals/Lockers
- Default Date Change in Block Reservations Screen

You can get involved in choosing the features you want to see added to Sportsman Web here:
