Restriction

Block Reservation
Multi-Delete and
Location Filter

The Newest
Generation of
ActivityReg

I want to thank all of our customers and friends who stopped by our booth at NRPA. We had an amazing show and hearing from you gives us a lot of insight into how we're doing and how we can best serve you. If you didn't make it, don't be a stranger and feel free to call us with any feedback.

We've been working on it for more than a year and I'm proud to say our next generation of ActivityReg is here! We expect to have the first customers on the new site in late October. For now, it's live on our production servers, we're finishing up final testing. You'll love it as it's sporty, it's modern and fast! There's a modern website builder in Sportsman Web and turning it on is easy. We'll be doing a webinar in November to demonstrate the features and demystify the process. And as always, our staff will be ready to assist you. The new version of ActivityReg will be available at no additional cost to all of our Sportsman Cloud clients.

In the main Sportsman Web application, we've also added a Patron Notes Restriction to provide a better audit trail for you and prevent unauthorized editing of notes.

Wishing everyone the best as we dive into the holiday season.

- Charlie Warrell, Director of Development & CEO

Patron Notes Edit Restriction

What our clients want, our clients get! This feature came from the Sportsman Feature Request Voting Board and we are only too happy to be able to deliver you a new configuration option for restricting the editing of patron notes to only those with administrative privileges.

The screenshot shows the 'Site Configuration' interface with the 'Group Settings' tab selected. In the 'Misc' section, the option 'Restrict Patron Note Editing To Admins' is checked. Other sections include 'Entry/New Member Settings', 'Residency Qualification Method', and 'Annual Waivers'.

With the restricted notes setting enabled, any user will still be able to enter a note on the patron's account which will be time-stamped with the information of the user who entered the note.

The screenshot shows the 'Notes' tab in the 'Individual' profile view. A note is displayed with the text: 'Note edited by admin (BRIANNE) on 10/17/2024 10:27 am:'.

However, only a user with administrative permissions will be able to delete or edit any existing notes. Notes that are edited or removed by an administrator will still show a time-stamp indicating that a modification was made.

Location Filter and Multi-Delete for Block Reservations

We live for a client-driven update to Sportsman, and this small but mighty addition is one we know will make life a little bit easier for our clients who spend a lot of time organizing block reservations.

We've made a couple of recent upgrades to the block reservations screen that may cause spontaneous happy dancing. The first is the addition of a Multi-Delete button which does just what it says, allows you to delete multiple reservations in one fell swoop. Second, is a new filter for locations. Choose from one, multiple or all locations to see only the reservations you're looking for.

The screenshot shows the 'Block Reservations' interface. A 'Location Filter' dropdown is highlighted, showing options for 'Court 2', 'All Locations', and 'Court 1'. Below the table, the 'Multi-Delete' button is visible. The table lists reservations with columns for Date, DOW, Facility, From, To, Hours, Location, and # of Resv.

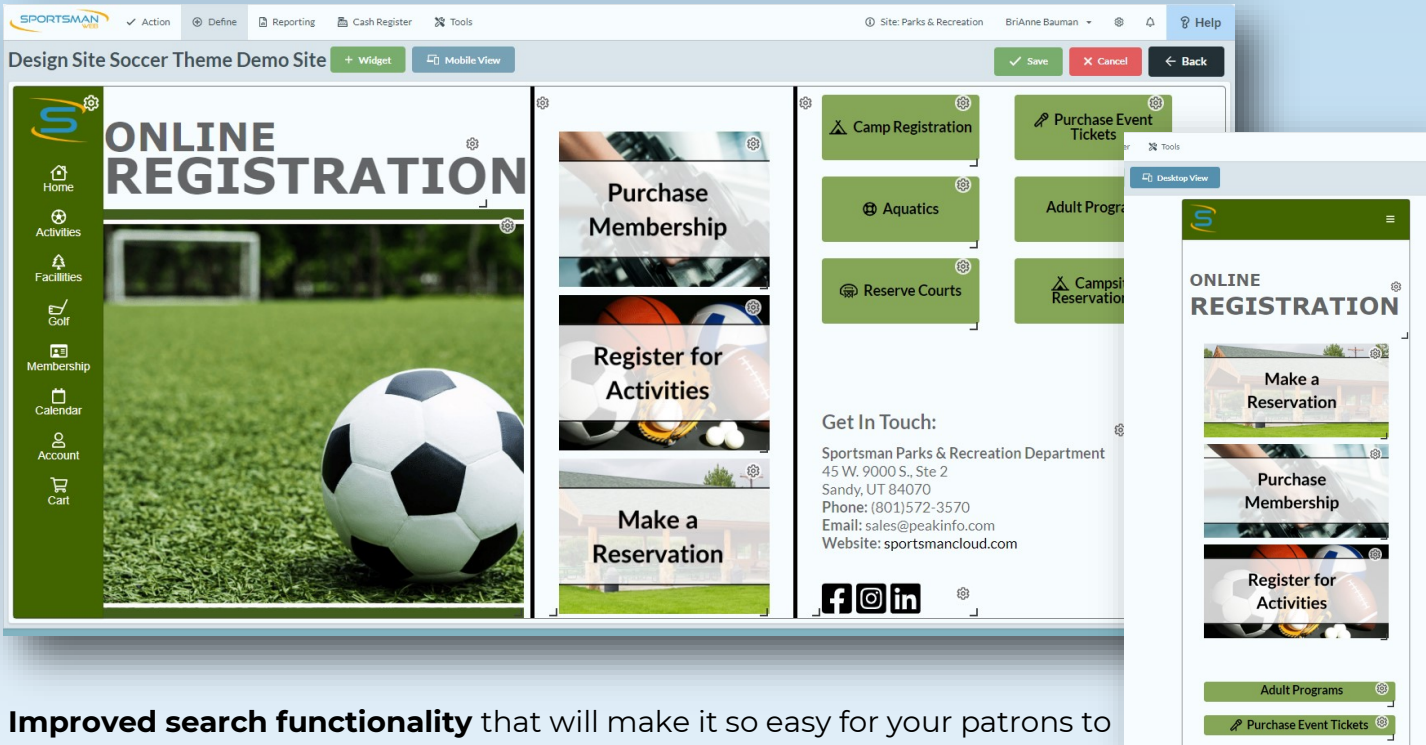

Date	DOW	Facility	From	To	Hours	Location	# of Resv
11/17/2023	Fri	Court 2	8:00 pm	9:00 pm	1	Court 1	49
12/01/2023	Fri	Court 2	8:00 pm	9:00 pm	1	Court 2	3
12/15/2023	Fri	Court 2	8:00 pm	9:00 pm	1		

Welcoming the Next Generation of ActivityReg

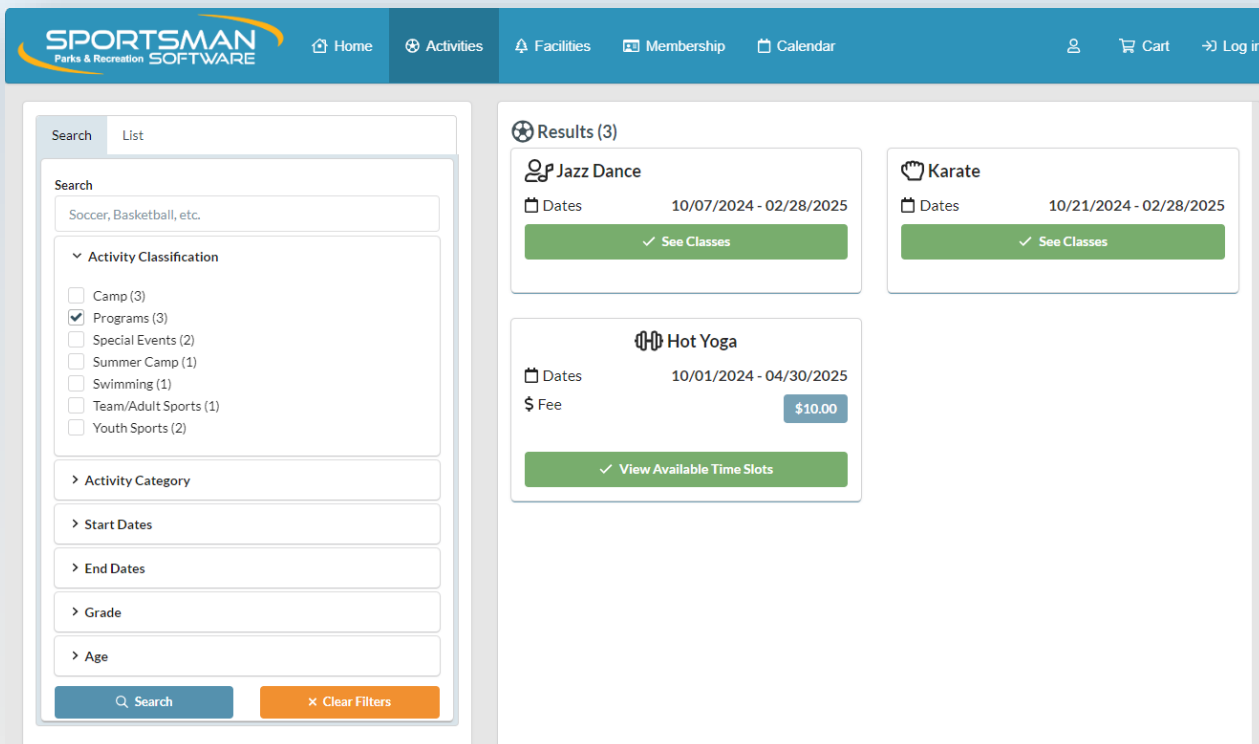

Allow me to introduce you to the labor of love that the Sportsman development team has been pouring their hearts and souls into for more than a year. The newest generation of ActivityReg is here and let me tell you, we couldn't be more proud.

Some of our favorite features of the new ActivityReg include:

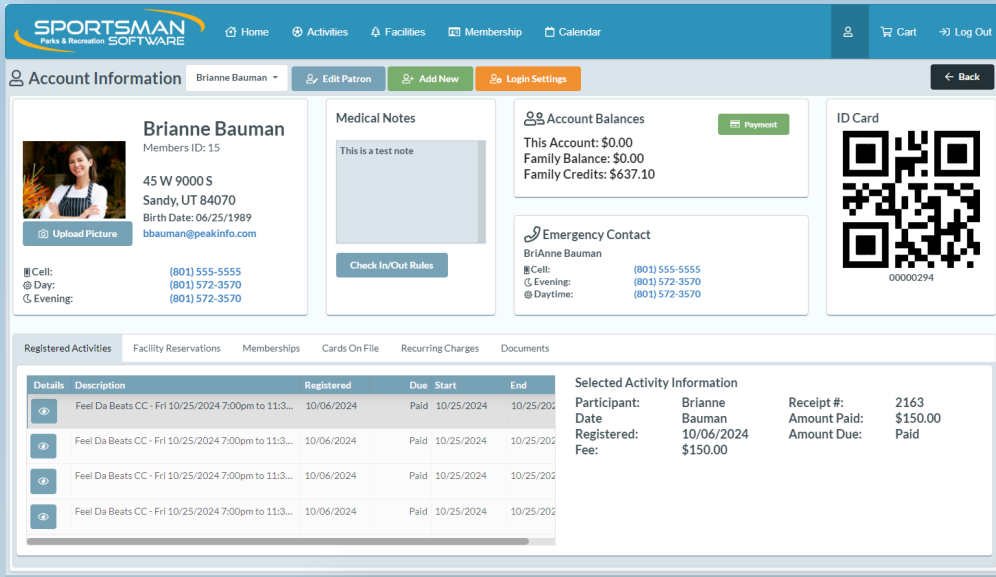

An easy to use site editor that makes designing a beautiful, user-friendly site a total breeze.

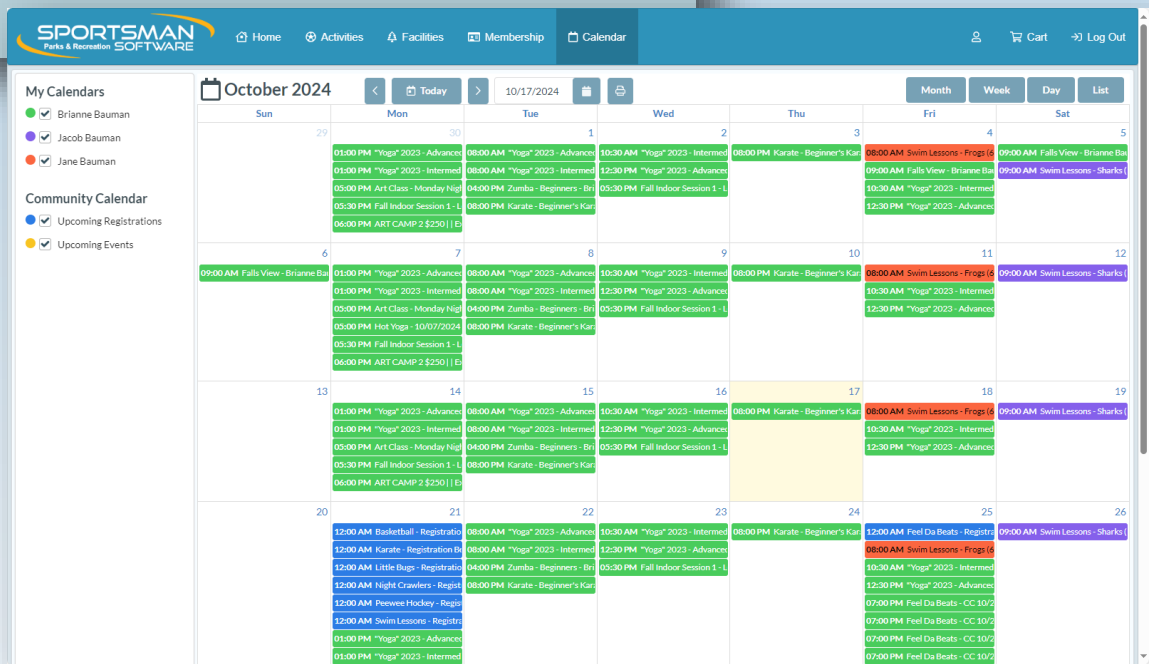

Improved search functionality that will make it so easy for your patrons to find and register for the activities they're looking for. Search options include: Activity Category, Start and End Dates, Grade, Age Range, as well as a search bar.

A beautifully redesigned account screen, with the patron's ID card easily accessible.

A customizable calendar, unique to the logged in account holder. Patrons will see a calendar of all of their upcoming activity dates, color coded and with filters that allow them to choose who's activities are shown.

We had an amazing time at NRPA in Atlanta this month.

Thank you to all those who stopped by to say hi. It's always nice to meet with our clients face to face, and we enjoyed spending time with so many of you. Working with our clients is easily the best part of what we do!
