It's been a busy summer here at Peak Software! Just as you've been hard at work running summer camps, managing pools, and keeping your programs running smoothly, our team has been upgrading infrastructure and developing the latest round of enhancements for Sportsman.

We're excited to announce major improvements to our disaster recovery and redundancy systems for cloud-hosted services. These upgrades significantly reduce potential downtime in the event of a disaster, ensuring greater reliability for your staff.

We've also made it easier than ever for patrons to stay informed about their activity schedules with the new patron calendar import feature.

This allows patrons to subscribe to an activity calendar and receive automatic live updates whenever the schedule changes.

For our golf customers, the wait is over; ActivityReg 3.0 now supports online tee time reservations!

Additionally, the popular multi-week camp registration interface previously available in ActivityReg 3.0 is now available in Sportsman Web, making it a breeze to register participants for multiple weeks of summer camp.

We hope you're enjoying a great summer, and we're excited to continue bringing you new features to support your programs and your community!

- Zachary Warrell, Lead Developer

Announcing Our Newly Enhanced Disaster Recovery (DR) System

At Peak Software, protecting your data has always been a top priority. As part of our ongoing commitment to data security, we've invested heavily in enhancements to our Disaster Recovery System.

While we've had data replication in place for several years through Microsoft Azure, our enhanced DR system now replicates data every 30

seconds to a fully redundant environment that operates 24/7. This ensures near real-time backups and seamless failover capabilities.

This advanced setup allows us to deploy software updates in real time and, in the event of a major issue, quickly restore services with minimal disruption.

Although natural disasters like earthquakes or floods come to mind, the more common threats we plan for include fires, construction related outages, or cyberattacks. Our Disaster Recovery system is safeguarded by two state of the art data centers and built on high-availability clusters of servers, routers and redundant power and internet connections.

We're proud to share the completion of this newly enhanced system, and continue to demonstrate our commitment to keeping your data safe, secure and accessible, even in the face of catastrophe.

Peak Software takes your data needs seriously, and you can rest assured that your information is in good hands with our team.

Community Calendar Import

We're excited to announce a new feature for your ActivityReg patron registration site! Your patrons can now add schedules for their activities directly to their personal calendars. Import is available for iPhone, Outlook, or Google Calendar.

No login is required to import schedules. Patrons can import from the Scores and Schedules page on your ActivityReg site. The import button is also accessible from the confirmation page after registration and in the registration confirmation email.

This new import function makes it even easier for families to stay organized and never miss a game, class or event!

Golf Management on ActivityReg 3.0 - (In Beta Testing)

The response to ActivityReg 3.0 has been overwhelmingly positive. Your patrons and employees are loving the new custom community calendar views, the redesigned patron account screen, and the fresh modern look and feel of the new site layouts.

We're excited to announce that beta testing of Tee-Time reservations on ActivityReg 3.0 has begun. For all of our Sportsman Golf Management users, keep an eye out for wide release of Golf features on ActivityReg 3.0 soon!

The image displays two screenshots of the ActivityReg 3.0 interface. The left screenshot shows the 'Search Available Tee Times' page with filters for Golf Courses (Sunset Grove), Date (07/16/2025), and Desired Time (Afternoon - 11:00am To 03:00pm). The right screenshot shows the 'Reserve A Tee Time' modal with reservation details for Sunset Grove on Wednesday 07/16/2025 at 11:45 am. The details include Course (Sunset Grove), Date/Time (Wednesday 07/16/2025 at 11:45 am), Availability (4/4), Number Of Golfers (2), Number Of Holes (18), and a checkbox for 'Players Want A Cart'. There is also a field for 'Additional Comments(if any)' and 'OK' and 'Cancel' buttons.

Multi-Registration for In-House Transactions - (In-House Testing)

Last year, we introduced the **Multi-Select/Camp Registration Style & Prompt for Number of Registrations** program definition settings, making it easier than ever for your patrons to register multiple family members for multiple classes at one time on your ActivityReg site. Multi-Registration is a huge time saver for your patrons and reduces frustration by securing spots for the whole family in even the most competitive registrations.

Now, we're bringing that same convenience to your front desk! With Multi-Registration for in-house transactions, your staff can quickly register families for multiple activities in a single, streamlined process. Questions only need to be answered once, waivers are signed once per person, and your patrons are checked out and ready to go in record time.

Our team is working hard to iron out any kinks before we open this feature up to our beta testers. We're excited to put this awesome tool into your hands soon.

The image shows a screenshot of the 'Summer Camp Registration' interface. It includes a navigation bar with 'Define', 'Reporting', 'Cash Register', and 'Tools'. The main content area is titled 'Summer Camp Registration' and shows a progress indicator '1/3'. Under '1. Members to Register', there are buttons for 'Dad Baker', 'Wife Baker', 'Son1 Baker', 'Son2 Baker', 'Son3 Baker', 'Daughter1 Baker', and 'Daughter2 Baker'. Under '2. Select Classes For Registration', there is a table with columns for Name, Date/Time, Availability, Fee, and Sign Up.

Name	Date/Time	Availability	Fee	Sign Up
Boys Week 1	05/01/2025-06/06/2025 View Schedule (Mon, Tues, Wed, Thurs, Fri)	26 / 30	\$250.00	<input checked="" type="checkbox"/>
Girls Week 1	06/02/2025-06/06/2025 View Schedule (Mon, Tues, Wed, Thurs, Fri)	30 / 30	\$250.00	<input type="checkbox"/>
Boys Week 2	06/09/2025-06/13/2025 View Schedule (Mon, Tues, Wed, Thurs, Fri)	29 / 30	\$250.00	<input checked="" type="checkbox"/>
Girls Week 2	06/09/2025-06/13/2025 View Schedule (Mon, Tues, Wed, Thurs, Fri)	30 / 30	\$250.00	<input type="checkbox"/>

At the bottom, there are 'Next' and 'Cancel' buttons.
