The Sportsman Software team has been busy this quarter, working on several new features aimed at making your registrations smoother and more efficient than ever. We've taken our lead from your submissions on the feature request board and your feedback has been instrumental in shaping this season's new functionality. Thank you for getting involved in helping us make Sportsman better than ever with your great ideas! Here's what's new:

E-Signatures for Memberships and Facilities: We've expanded our popular e-signature feature from Activities to Memberships and Facilities, so it's easier than ever to manage waivers.

Activity Locations: You can now assign locations to activities, helping patrons find exactly where they need to be.

Custom Landing Pages: Tailor your landing pages within your activity tree to your organization.

Enhanced ADA Accessibility: We've rolled out improvements on ActivityReg to better serve patrons of all abilities including alt text on images, etc.

Multiple Family Groups: We've simplified managing split families by allowing children to be part of multiple family groups within Sportsman.

Required Documents (Beta Coming Soon): Soon you'll be able to require document uploads during or after activity registration, complete with a review workflow and automated reminders for missing documents. If you'd like to participate in the beta, **[Let Us Know!](#)**

We're proud to deliver these enhancements to support you and your communities. Your ongoing feedback continues to drive our innovation, so keep it coming!

Thank you for being a valued Sportsman customer.

- Zachary Warrell, Head of Development

Required Documents Feature: Beta Testers Wanted!

Required Documents is coming! We've conducted a thorough in-house testing process and we're looking for beta testers. If you'd like to be among the first to use and provide feedback on the Required Documents feature, click the link below to sign up:

Waiver E-Signature for Facility Reservations & Membership Sales

Last year, we introduced e-signed waivers for in-person activity registrations, and the response was overwhelming! Expansion of this feature quickly became one of our most requested enhancements. Since you asked, we delivered, and e-signature is now supported for Facility Reservations and Membership sales as well.

Once e-signature is enabled, the system will introduce a step during the sales process to prompt for a secure text message to be sent to the patron's mobile device, allowing them to review and complete their waiver on the spot before the sale is completed.

Administrators can override the e-signature process if a patron does not have a mobile device available at checkout as needed. This feature not only saves time and reduces

paper waste, but also helps eliminate human error from missing or misplaced waivers, ensuring smoother operations for your patrons and staff.

Activity Location Definition

The only thing worse than showing up to the rec center for your child's soccer practice, only to find out that you should be at the sports complex, is being the front desk attendant who has to break that bad news to the frazzled, possibly angry misdirected parent.

To help eliminate those potential mix-ups, we've introduced a new feature that lets you define a clear location for each activity. The location is displayed alongside the activity description online, so patrons always know exactly where they're headed. It's a simple improvement that keeps schedules on track, reduces phone calls, and helps everyone arrive at the right place the first time.

The image shows two overlapping screenshots from a software interface. The background screenshot is a 'Location Add' form with the following fields: Description (Peak Recreation Sports Complex), Address (123 Sports Field Road), City (Sandy), State (UT), and Zip (84070). It includes 'OK' and 'Cancel' buttons and an 'Inactive' checkbox. The foreground screenshot is a card for 'Fall Concert Series' with the text 'Live music and lots of great activities. Come join the fun this fall!'. It shows Dates (09/26/2025 - 09/28/2025), Location (Peak Recreation Amphitheater), and Fee (\$10.00 - \$45.00). A green button at the bottom says 'View And Purchase Tickets'.

Introducing Split Family Patron Accounts

We know every family looks a little different, and patron accounts should be able to reflect that. Our new Split-Family Patron Accounts feature allows a dependent to belong to multiple groups, whether that's two households, guardians who share responsibilities, or other unique family arrangements.

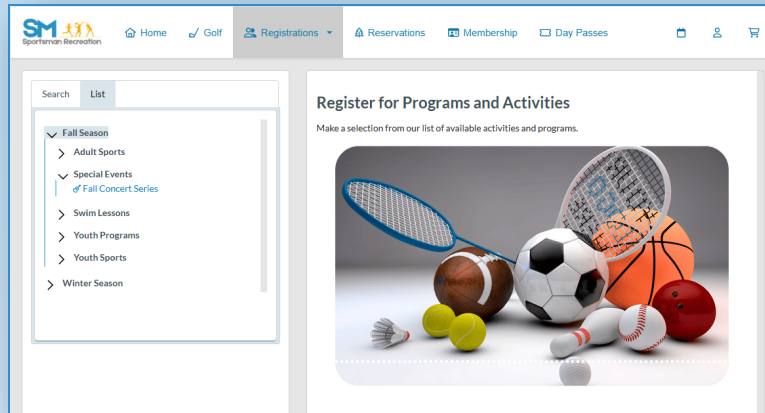

With this enhancement, both authorized guardians can view the dependent's activity information directly from their own accounts; no duplicate logins or back-and-forth required. Balances can be shared between households, allowing each account to contribute its portion of registration fees. And, to protect privacy, each account can only access information related to the dependent, not other members of the group. With Split-Family Patron Accounts, your patrons will have flexibility without compromising security.

The image shows a confirmation dialog box with a question mark icon and the text '? Are You Sure?'. Below the question is the text 'Do you want to add Darlene Nielson to both groups or remove from their existing group?'. At the bottom, there are two buttons: 'Add To Second Group' (highlighted with an orange border) and 'Remove From Existing Group'.

Customizable Activity Registration & Facility Reservation Landing Pages

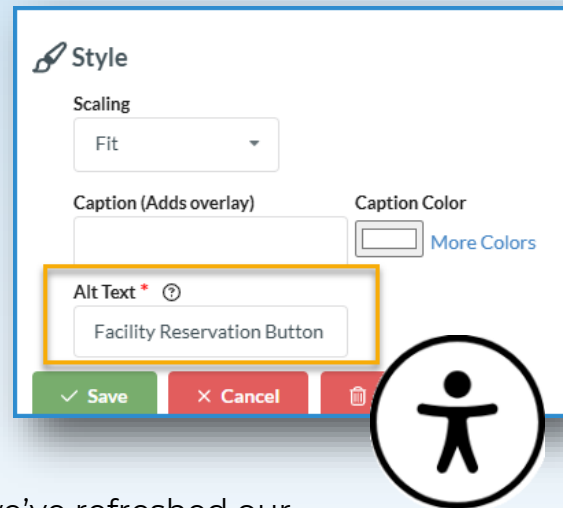

When we launched ActivityReg 3.0 early this year, customers gained the ability to create modern, beautifully designed patron facing websites using Sportsman Web. At the time, the landing pages for activity registration and facility reservations were hard coded.

Now, we've taken things a step further. With our latest enhancement, those landing pages are fully customizable, allowing you to add your own images and messaging to reflect your community, your brand, and your unique organization.

Improved Accessibility on ActivityReg 3.0

Accessibility has always been a priority in ActivityReg, with inclusive tools like the UserWay widget offering improved contrast, adjustable text size, dyslexia-friendly fonts and more. Now, we've taken another meaningful step forward. Images added to ActivityReg 3.0 websites now require alternative text, ensuring screen readers can clearly communicate visual content to patrons of all abilities. This small but powerful enhancement makes your online experience more welcoming and accessible for everyone.

Updated Accessibility Statement

Alongside our latest accessibility enhancements, we've refreshed our Accessibility Statement to better reflect the inclusive features built into ActivityReg. You now have the option to display this statement directly on your patron-facing website, giving visitors clarity and confidence in the accessibility of your online services. If you'd like to enable it, simply navigate to Site Configuration → Internet tab → ActivityReg Options. It's an easy way to show your commitment to an accessible experience for every patron.
